ACCESSORIES INCLUDED

PR02 x 2 - Premium 4 channel remote controls - Battery indicator, durable, stylish and secure with code hopping technology

WB02 x 1 - 3 Channel wireless wall remote

Weight Bar x 1 - Helps door stabilization and balance

SMART

WiFi Module compatible

With simple "push in" terminals the Jaytech RDO 1000 integrates seamlessly with almost all "smart" appliances such as the smartgate (sold separately)- Monitor and control your garage door whilst you are away, set up custom actions and notifications, play music and open your garage door with voice control. Integrates with Google Home, Alexa, Apple Home kit and IFTTT with no subscription fees.

SECURE

Micro Intellectual Control

One touch button to control open, stop and close and Rolling Code technology. When the transmitter sends a code, it generates a new code using an encoder. What does this mean? Put simply it means that no one else apart from the owner of the remote control can operate the garage door.

It cannot be copied and gives you total security and peace of mind.

INTELLIGENT

Safety reverse and door mapping

A microprocessor computes the amount of force required to open and close the door safely and learns where the stiff spots are in your doors movement so that if an obstacle is encountered (car, person etc) the opener will recognize this and will automatically reverse.

POWERFUL & QUIET 1000N DC MOTOR

OPTIONAL ACCESSORIES

SMART WIFI

The most advanced smart garage door control device in the world. Manufactured by North American company Remsol. The SmartGate can operate with and without an internet connection. Users can operate their garage door and/or gate using voice commands and/or the included smartphone app. Create custom rules (such as "close my garage door if it is still open at 10PM") and monitor your garage security remotely.

PE BEAMS

Increases garage door safety by passing an invisible 'light beam' in front of your garage door. If this beam is broken by an obstruction (vehicle, person or obstacle) it will prevent the garage door from closing and alert the user of an obstruction. Available in both wired and semi wireless versions for ease of installation.

SECURITY PIN KEYPAD

Great for people that love to exercise but don't want to take a remote control, or for kids that are prone to losing them! Give a Tradesperson, Delivery Driver or Cleaner temporary or permanent access without worrying about them returning the keys. Weather resistant – can be mounted outside. Audible signals. Easy to install. Replaceable long life battery.

SUNVISOR REMOTE CONTROL

Designed with ease of use in mind, the SV01 has an easy to find, large push button. Strong stainless steel clip ensures it stays in place. Exceptional range of up to 300m. Long lasting, replaceable battery. 3 channel transmitter can control up to 3 devices. LED battery indicator light

BATTERY BACKUP KIT

Easy installation – can be completed in less than 10 minutes. 5 year average life span. 24V 3.5 Ah SLA providing enough power for up to 5 days use. Kit includes tray, brackets and wires required for neat installation.
